

Email Continuity

Email On-Demand

Protect your business from server outages with The Email Laundry's Email Continuity service. Email continuity is available during normal operations for when you're away from your computer or during disasters that knock your inbox offline. We're the leading developers in email security, which means your business is safe in our hands.

Features

- Rolling message capture for 14 days
- Web folder access from Outlook
- Webmail access from any browser
- Mailbox synchronization once the disaster is over

Peace of Mind

In the event of a server outage, users can log into the off-site mailbox through their webmail interface to access saved emails. During this time, inbound mail will continue to be routed to our email continuity mailboxes and a copy of the original email will be delivered to you once your organization is back online. In these cases, inbound mail is queued for 5 days by default, but in the event of a major outage, this can be extended.
