

You've Been Phished!

Phishing Awareness Training Program

Reports show a dangerous rise in the number of businesses being compromised by phishing emails. It's time to teach your employees how to spot a cyber threat in their inbox before it damages your company! Our Phishing Awareness Training Program dramatically reduces the risk of phishing attacks getting past both your perimeter protection and your now-educated employees.

Training Your Staff to Spot Phishing Attacks Couldn't Be Easier When Using Our Reality-Based Training System.

Here's how it works:

User Training Session

We train your users on the basics of phishing. Teaching them to identify a phishing email, what to do when they receive one, and the consequences phishing can have on companies.

Hands on Testing

We test your employees by sending them (safe) phishing emails based on current phishing trends and tactics.

Re-Training Sessions

If a user clicks on the phishing link, they will be taken back to the Phishing Awareness Training page where they must complete online training on how to spot an attack.

Susceptibility Reports

You can access reports on your company's phishing susceptibility rate as well as who has and hasn't completed the training.

Continuous Testing

We repeat the process at regular intervals with varied emails and difficulty levels to keep employees educated and alert at all times.

PROTECT YOUR BUSINESS FROM PHISHING

Keeping Email Safe

Phishing Awareness Training Offers Our Clients Multiple Benefits Through Tailored Solutions.

These packages include:

Focused Training

Teaching moments are exploited to provide specialized training for users that demonstrate their susceptibility to phishing.

Evolving Threats

Live exercises are performed regularly with escalating complexity based on the user's awareness in previous exercises.

Tracked Metrics

Metrics from exercises can be tracked over time to determine the effectiveness of training across various objectives and organizational demographics.

Customized Training

Components of our Phishing Awareness Training services can be implemented separately or in tandem to meet your organization's specific needs.
